Kenella

DRILL STEEL, RODS & BITS

At Harlen Supplies, we offer premium Kenella Directional Drill Steel and Drill Bits engineered specifically for the dimension stone industry. Designed for precision, durability, and efficiency, these tools are essential for making accurate directional cuts in pre-drilled holes — streamlining block separation and reducing waste. As trusted suppliers, we provide a complete range of high-performance products to meet your quarrying needs. Directional drilling not only improves cutting accuracy but also enhances productivity and profitability by saving time and minimizing material loss.

Applications:

- **Dimension Stone Quarrying:** Ideal for precision directional drilling, enabling the clean extraction of large stone blocks with minimal material loss.
- **Granite & Marble Extraction:** Perfect for making controlled, accurate cuts in high-value dimension stones like granite, marble, and limestone.

Key Benefits:

- **Precision & Control:** Specially engineered for the dimension stone industry, our drill bits and steel deliver straight, accurate cuts for clean block separation. The non-rotating, machined round shank ensures consistent directional alignment and control throughout drilling.
- **Reduced Stone Damage:** Accurate directional drilling techniques minimize cracks and preserve the structural integrity of high-value materials like granite, marble, and limestone — ensuring better-quality blocks with less breakage.
- **Higher Yield & Efficiency:** Optimized bit geometry (available in 38mm and 40mm sizes) enables clean, efficient cuts that reduce waste and maximize material recovery — boosting overall productivity and profitability in quarrying operations.

Product Range:

Directional Drill Bits - Designed for clean, controlled directional cuts

- Sizes: 38mm and 40mm

Directional Drill Steel - Machined round shank for non-rotating, accurate directional drilling

- Size: 22mm Hex 108 with forged collar
- Lengths: 0.8m, 1.6m, 2.4m, and 3.2m
