HARLEN SUPPLIES

QUARRYING | MINING | CONSTRUCTION

Diamond Wire

Harlen Supplies offer premium diamond wire for the quarrying and construction industry. With years of hands-on experience and technical expertise, we offer top-tier diamond wire designed to maximise performance, reliability, and efficiency in stone cutting. Our high-performance quarry diamond wire is engineered using industrial-grade diamond beads securely fastened to a robust steel cable. This advanced cutting solution, driven by an electric diamond wire saw, ensures clean, accurate vertical and horizontal cuts with minimal stone damage — ideal for ensuring the extraction of large blocks in dimension stone quarries.

PRECISION DIAMOND WIRE FOR STONE AND CONCRETE CUTTING

Targeted Applications:

- **Dimension Stone Extraction:** Achieve accurate, clean cuts of large stone blocks in granite, marble, and sandstone quarries — ideal for high-value material recovery.
- **Construction Cutting:** Designed for fast and effective cutting through reinforced concrete, structural beams, and other hard construction materials.
- **Controlled Demolition:** Perfect for confined or sensitive environments, offering low-vibration, low-noise cutting for precise, safe dismantling work.

Key Advantages:

- **Exceptional Cutting Accuracy:** Engineered for fine, clean cuts with minimal chipping or stone damage — preserving surface quality and reducing finishing work.
- **Enhanced Efficiency:** Streamlines the extraction process, saving time and reducing labor with faster cutting speeds.
- **Low Waste, High Yield:** Minimises material loss, helping you get the most out of each block with maximum usable output.
- **Highly Adaptable:** Suitable for a wide range of materials and diverse site conditions.

Product Range:

Harlen Supplies provides a full selection of quarrying diamond wire solutions, tailored to the specific demands of **Granite, Marble, Sandstone and Reinforced Concrete**. Available in a variety of bead diameters and configurations to match your cutting environment, material type, and machinery setup.
